PROJECTS

Podcast app ([GitHub Link](#))

- Developed a podcast app with sorting, filtering, and favorite-saving features. Built using React and TypeScript, it delivers an intuitive user experience.

Mobile app ([GitHub Link](#)) — 2024

- Developed a responsive mobile web application for tracking grocery shopping needs, following a code-along on Scrimba. Utilized Firebase for real-time data storage and updates, allowing users to add and delete grocery items, enhancing the shopping experience.

Interactive web app ([GitHub link](#)) — 2024

- Developed a menu display system for a fictional restaurant, 'CodeCuisine,' as part of a coding challenge. Created an interactive web application using JavaScript to showcase food categories and enable users to add items to their order with a click. Applied JavaScript concepts such as functions, closures, and event handling to build a dynamic and user-friendly interface.

On Demand Sound Website ([Website link](#)) — 2024

- Developed a website for On Demand Sound, designed to showcase the company's DJ equipment rental services and

event staffing options. The site features an interactive interface for clients to explore services, request bookings, and learn more about the offerings
